**Spacious Doctor Table**  
- 470mm x 300mm

## 1. Function & Convenience 1. More comfortable & accurate treatment with optimized treatment positioning design!

**Excellent accessibility for operators**  
Optimizing patient access during treatment with the thin back design enabling comfortable operator's lower body positioning.

**A wide space for an assistant**  
More space is allowed for gargling as an axillary table brackets can be rotated as a rotational cuspidor is employed.

**Surgical table (optional)**  
A surgical table providing ease of surgery

**2nd Assi / Self Suction Tool (optional)**  
This tool allows for hands-free suction, which can be useful to free hands during procedures, or even when working alone.

**Head-Rest (basic)**

**2-joint Headrest (optional)**  
More precise positioning control for treatment

### 2. Smart & Intutive Unit Function

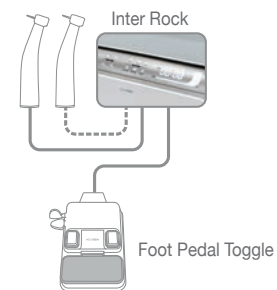

- LED display showing chair operation status in one glance
- Selection of functions is made easy and intuitive by adopting All Touch Screen (capacitive).
- Built-in handpiece interlock function (safety is increased as only the first selected handpiece is enabled.)
- Scaler ON/OFF operation is toggled by the foot pedal.
- A wide doctor table for a variety of treatments

Doctor table

4 Color : White, Blue, Green, Pink  
4 color options are available per operator's preference.

## 2. Impressive patient comfort

### 1. As comfortable as sitting in a first-class airplane seat

- Maximizes patient comfort with an ergonomic seat and body design
- Curved chair design that does not stress the spine during long treatments with a wide back-rest, top of class in the industry
- Comfortable headrest with 2 joints that can be adjusted flexibly in inclination and height depending on the treatment situation and patient posture
- Very accessible for children/elderly, with the lowest seat position in the industry

**Luxurious & comfortable seat**  
Enhances the dignity of dental service by providing the best positions for both operators and patients.

Back-Rest

- A wide backrest, the industry top, for comfortable lying of patients with any body size.
- Curved ergonomic design, most comfortable for patient spine.

**Arm-Rest**  
Rotating armrest convenient for patient entry/exit.

### 3. Effective communication A large monitor facilitating communication between a doctor and patients.

A base fix type monitor arm is employed.  
With the adoption of a 43" large wide screen, convenient/accurate surgery is enabled with efficient consultation and treatment communication with patients.

**Mount Type (Arm Type)**  
For streamlined communication with patients, 24" monitor (option 43") is mounted on the light arm.

**Cart Type**  
If needed, a 24" monitor can also be installed additionally to the cart type, maximizing doctor's intuitive response during surgery.

### 4. Easy to Assist

#### Assisting is made easy and convenient

**LED indicating cold/hot water visibility & mood lamp effect**

**Built-in paper tissue box**  
clean treatment environment

**Rotational cuspidor type**  
The 90-degree rotational cuspidor design provides convenient gargling position for patients, and ease of disintegration and cleaning.

**Foot Controller**  
· The handpiece output can be controlled in multiple steps with the pedal.  
· The foot cradle minimizes the risk of infection when moving.

**Clean Water (optional)**  
· During surgery, distilled water can be used after shutting down the original water source.  
· Minimization of infection risk  
· Handpiece nozzle cleaning function

**Assist Unit**  
· The 2-joint structure increases accessibility and ease of securing space.  
· One extra hole is provided.

**Dual Light (optional)**  
· No shadowing  
· ① Dual Light ML 100A (No Camera)  
· ② Dual Light ML 100B (Camera included)

### 5. Durability & Trust

We have philosophy that we are not selling any products without responsibility. Through the 'NEXT's Guarantee Program, we are going to prove our value.

#### Warranty

This warranty is only applied to the customer who purchases implant-chair package.
