Mate, you are a one of a kind and a brother from another mother! We are definitely going to keep in touch. I love being around you, I love your energy, and I have only scratched the surface of all I can learn from you. I want to come visit Syd but I also will line up cases to do together in Tassie if you are serious about coming. I have a feeling it's the start of a long friendship! Thank you for all your kindness to me, to my staff, and to all the patients. You are a legend!

Thank you all for help and support. I appreciate your hard work organising this very helpful course. And it was so lovely to meet all the lovely people. I hope I get a chance to meet everybody again. I wish everybody best with life and business.

Thank you ALL!!
It was great meeting you and learning from you. Back home with a lot more of experience and learning. All in all a great experience. Great to meet and make new friends! Let's stay in touch. Thanks again to the entire team.

Thank you team for all your relentless organising and hustle every minute of each day.
Thank you Ahmed and Mouhamad for being so generous with your time and expertise to help each of us improve our patients' health. Can't put a price on any of those things! Wishing each of you safe and happy returns, and motivation to put this experience to use next week and onwards.
